PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ year of production experience building scalable web applications and AI-powered products using Python (FastAPI), React, TypeScript, PostgreSQL, Redis, Docker, and AWS. Experienced in architecting REST APIs, integrating LLMs (OpenAI GPT, Gemini), and shipping cloud-native applications with CI/CD pipelines. Recognized for systems thinking, rapid learning, strong ownership, and translating ambiguous requirements into reliable production solutions. Immediate Joiner eager to contribute to high-impact engineering teams.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, WebRTC, Socket.io, Responsive Design

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, WebSockets, Microservices

Database & Storage: PostgreSQL, MongoDB, Redis, SQL, Database Design, Tableau, Prisma, Power BI, Databricks

DevOps & Tools: Docker, GitHub Actions, CI/CD Pipelines, Git, GitHub, Linux (Ubuntu), Agile/Scrum

Cloud & Hosting: AWS (EC2, S3, RDS, Lambda, VPC, IAM), Vercel, Render, Cloud Security

EXPERIENCE

Mitroz Technologies

ReactJs Developer

Dec 2025 – May 2026

Pune, India

- **Developed and maintained** production-grade **React.js front-end applications** with responsive UI, integrated RESTful APIs, and real-time features; deployed via Docker-containerised **CI/CD pipelines (GitHub Actions)** to Vercel and Render, ensuring consistent uptime and performance.
- Collaborated in Agile teams with backend engineers and UI/UX designers; resolved production issues end-to-end through debugging, code reviews, and performance optimisation, consistently delivering features on schedule.

Rego Digital Solutions — Trainee Software Engineer

Full Stack Development

Jun 2025 – Dec 2025

Pune, India

- Delivered 4 production client applications end-to-end within Agile/Scrum sprints, consistently meeting deadlines with **zero critical post-release defects**
- Developed responsive **React (TypeScript) frontend** systems for **2 major projects**, improving component reusability by 50% and enhancing UI performance and user experience.
- **Integrated RESTful APIs** and set up automated testing pipelines using **Jest and React Testing Library**, increasing test coverage from 0% to 70% on both projects.

PROJECTS

Peer Link — Anonymous P2P Chat & File Sharing

[Live Demo →](#)

React.js · WebRTC · Node.js · Socket.io · Express.js · Docker · CI/CD · Cloud-Deployed

- **Engineered** a real-time P2P platform using **WebRTC** with zero server-side storage; containerised with **Docker** and deployed via automated **CI/CD pipelines**; implemented SHA-256 file integrity verification for secure multi-file sessions.
- Built a lightweight Node.js + Socket.io signalling server optimising network overhead through efficient connection management and real-time event handling.

DevDeck Studio — Web Assembly Powered Algorithmic Workbench & Collaborative Snippet System

[Live Demo →](#)

MongoDB · Express.js · React.js · Node.js · Tailwind CSS · Typescript · TanStack · JWT · RBAC · Vercel · Render

- **Eliminated 100% of cloud compute overhead** and slashed execution latency to **sub-5ms** by architecting a client-side Web Assembly runtime using **Pyodide (Python 3)** and **isolated V8 Workers** integrated into a **multi-tab Monaco Editor interface**.
- **Enforced 100% storage quota compliance** across user workspaces by engineering a **Node.js/MongoDB backend** with atomic **50-snippet** folder constraints, automated cascade migration for orphaned records, and granular **RBAC** snippet sharing (**READ_ONLY vs. CAN_EDIT**).

ProxyFlow — Multi-Tenant API Gateway & Reverse Proxy Platform

[Live Demo →](#)

React · TypeScript · Node.js · Express.js · PostgreSQL · MongoDB · Docker · Tailwind CSS · REST APIs

- **Engineered a multi-tenant API gateway and reverse proxy platform** achieving sub-15ms request routing latency and 100% inter-tenant traffic isolation by developing deterministic route-prefix matching, SHA-256 hashed API key authentication.
- **Architected a high-throughput polyglot persistence model and real-time observability dashboard**, preventing database write bottlenecks during high-volume traffic spikes by isolating transactional workspace configurations in PostgreSQL

Project Management System

React.js · TypeScript · Node.js · Express.js · MongoDB / PostgreSQL · JWT · Docker

- **Architected a high-concurrency Project Management System**, reducing API response latency by 35% and guaranteeing 100% data integrity, by engineering optimized RESTful APIs with Node.js, Express, and database query indexing.
- **Delivered an interactive Kanban task-tracking platform**, boosting frontend component reusability by 45%, by building a modular React.js and TypeScript UI integrated with JWT/RBAC role-based authorization.

EDUCATION

International Institute of Information Technology, Hinjewadi, Pune

B.E. in Information Technology — CGPA: 7.45 (First Class)

Sant Tukaram English Medium School & Junior College, Pune

HSC (Class XII) — 88.67%

Aug 2021 – May 2025

Pune, India

Jun 2019 – Mar 2021

Pune, India

CERTIFICATIONS

- **Hugging Face Foundations of Agents** (2026)
- **AICTE AWS Virtual Internship (Grade O - Outstanding)** (2024)
